Spiderwear's System Delivers Circuit City Uniform Business

The Challenge

Spiderwear needed a new system to serve 40,000 employees in 600 stores.

- Hans defined and implemented a web-based warehouse and order management system.
- Uniform store allows Circuit City to manage and approve orders through Peoplesoft.

The Result

- Spiderwear can process 800% more orders in the same time.
- Zero fulfillment errors or omissions in 2007.
- System can support Spiderwear's other large client uniform programs.

Hans has consistently delivered solutions for us on deadline and under budget. He has a wonderful sense for what the client needs, and is always willing to go above and beyond if the project requires. I wouldn't hesitate to recommend Hans for your IT needs."

-- David Solomon,
COO, SpiderWear

2006 - 2007

Value, Value, Value

- **Primary: Demonstrate value to past and future companies**
- **Secondary: Demonstrate critical job skills or subject matter expertise**
- **Communicate value as headlines not articles**
 - **“Spiderwear’s order and warehouse management system increased productivity by 800%.”**
 - **“Market Velocity’s new platform reduced development time for new clients by 80%, while increasing profit margin by 135%.”**
 - **“The Home Depot eliminated 80% of paper-based safety reporting with an web-based management system.”**

Goal Statements

Job Descriptions

➤ Example 1

- I worked on the remake of a web tool supporting construction company logistics. I evaluated the company requirements for the project, compared the requirements to the capabilities of ASP.Net/VB.Net and ColdFusion. Considering all the aspects of the project I recommended ColdFusion for its document handling and reporting capabilities as well as the capabilities of the developers that would eventually take over the project. I redesigned the tool to function on an SQL 2003 DB Server with ColdFusion back-end support and Dreamweaver front-end development. I functioned as the focal point in discussions on business logic and developed application specifications for the project. The tool was designed to replace a SharePoint implementation, allowing a more flexible and functional interface for information flow and document management. I also designed and implemented the Database schema. The Web interface included a high degree of HTML, DHTML, JavaScript and CSS development including a version of Ajax interaction between JavaScript and CF components for real time data access.

➤ Example 2

- Managed re-design of business unit's retail website (Business to Business). Transformed website into an interactive, cross-selling educational tool, which boosted website visits by almost 15% within six months.
- Authored technical content for Request for Proposals (RFP's) and marketing communication plans that resulted in significant new business wins for business unit (\$1 Million dollars in minimum monthly recurring revenue).
- Architected COMPANY's secure extranet portal to support strategic partners and resellers. Portal enabled channel to double membership within three months.

Resume and Portfolio Tips

- **Define the 3 key things you want the reader to remember**
- **Use clean, consistent formatting and verb tense**
- **Correct spelling, grammar, and tone**
- **Demonstrate**
 - **Value**
 - **Special Knowledge**
- **Maximum 2 page resumes, abbreviate old jobs**
- **Everything you communicate must sell you for the position**

Overview, not Cover Letters

➤ Cover letters are typically used for stating what is missing from your resume.

➤ Overviews:

- Sells you the way you want to be seen
- Easy to adapt
- More memorable and effective

Delivering High ROI E-Business Applications

- Spiderwear's storefront and warehouse management system increased order processing efficiency by 80%.
- Market Velocity's new platform reduced development time for new client sites by 80%, while increasing profit margin by 135%.
- The Home Depot eliminated 80% of paper-based safety reporting with an online information and work flow management system.

"He is very intelligent, has great vision, and best of all, he can execute. His written skills are the best I've seen. He is excellent at working with his constituents to identify the need/challenge and then works to find the best possible solution. He is dedicated and loyal."
 -- Diane Morse, VP Sales & Marketing, Market Velocity, Inc.

Maximizing Team Productivity and Value

- Co-wrote a hybrid SDLC and templates to improve software quality from offshore development for Xpansion.
- Rebranded S&K Ventures to focus on core market, contributing to record growth in 2007 and a new business direction.
- Helped Voiccom Telecommunications develop a strategic partner channel, and reduced partner launch time from 3 weeks to 3 days.

"Hans has excellent communication and management skills. He was able to take very complex business problems and communicate them effectively to business and technical staff. I can honestly say that without Hans, the project we worked on would not have been close to being a success. Hands down, he's one of the brightest guys I've ever worked with, a true pleasure to work with."
 -- Todd Story, Software Engineer, S&K Ventures Inc.
